"There is no limit to what you can achieve"

Education

Holberton(ALX Africa SE) School   *Lagos, Nigeria*

SOFTWARE ENGINEERING   *Mar. 2021 - Jan. 2024*

- Concepts - Software design, Systems architecture, Application programming, Data structures and Algorithms, Unit testing, and Cloud computing.
- Tools - C, Python/Flask, JavaScript, Linux, NodeJs (ExpressJs), Git, Github Actions, CI/CD, MySQL, Postgresql, MongoDB, and Redis.
- DevOps - MS Azure, Apache, Digital Ocean, Render, Vagrant, and Nginx.

Cisco Networking Academy   *Lagos, Nigeria*

COMPUTER PROGRAMMING   *Mar. 2022 - Jan. 2023*

- Essentials of Javascript, C++, Python, and Linux operating systems.

Skills

DevOps	Microsoft Azure, Docker, Vagrant, Puppet, Github Actions, Git, Apache, Render, Nginx
Back-end	Express, Flask, REST API
Front-end	React, Redux, HTML5, CSS, Bootstrap, TailwindCSS, SASS, Jquery
Programming	Node.js, Python, Bash, Javascript, C, C++, GO, Matlab
Database	MySQL, Postgresql, MongoDB, Redis
Project Management	Jira, Trello

Experience

VersityEgde   *Ibadan, Nigeria*

SOFTWARE ENGINEER   *Aug. 2023 - July. 2024*

- Built fully automated CI/CD pipelines on GitHub for the applications using Github Actions and Azure Virtual Machine.
- Implemented RESTful API server for blog, forum, and UTME on the go features of the application.
- Built and deployed overall service infrastructure utilizing Github Actions, and several Microsoft Azure stack(Including Azure Virtual network, Postgresql, Virtual Machine, Azure Static Web application(SWA)), focusing on high-availability, fault tolerance, and auto-scaling.
- Developed an on-the-go Payment system which can be funded using direct deposits from all banks in Nigeria.
- Developed a flexible database architecture and design for easy management.

Projects

myDapp

CARTESI ROLLUPS BUILDER BOUNTY   *Aug. 2024*

- myDapp is a voting system built on blockchain technology. The application interact with a smart contract to enable consistent and persistent election result. It ensures secure and transparent election process through the blockchain security and enhance voter's trust.

Greenlight

PERSONAL PROJECT   *June. 2024*

- Greenlight is movie api built with go lang.
- It includes authentication and authorization of users.
- Implemented rate limiting technique to protect and prevent the application from being flooded by numerous service requests.
- Implemented graceful shutdown which allows the operating system (OS) to perform it's tasks safely after shutting down processes and connections are been closed.

Will Be There (RSVP)

ADC-HACKATHON   *Apr. 2024*

- WillBeThere is an intuitive online RSVP service designed to simplify event organization and attendance tracking.
- The application enables registered users to effortlessly create events, share event links with friends and easily manage RSVPs to ensure smooth event coordination.
- Designed event dashboard, event creation and event modal with easy to use User interface and seamless User experience
- Implemented event search functionality to ease access to events, either ongoing or completed.

AnyExam

HOLBERTON PORTFOLIO PROJECT *Nov. 2023*

- The goal of this project was to make computer-based exams more user-friendly and accessible for use in recruiting, organizing, and school evaluations. This project is helpful in evaluating applicants throughout the hiring process.

Secure Password Manager API (SAPI)

TREBLLE HACKATHON *Apr. 2023*

- Secure Password Manager API (SAPI) is a server-side application used for password storage, generating passwords, and protecting against password breaches on the internet.

Volunteering

Dareword Students Association (DSA) *Nigeria*

STUDENT MENTOR *Aug. 2021 - Oct. 2023*

- Mentored two freshmen until a sophomore.
- Tutored classmates on Python programming.
- Tutored peer learning partners on projects in C and Python programming

Honors & Awards

2024	**Winner,** Cartesi Rollup Builder Bounty	*Singapore (Remote)*
2024	**6th Place,** ADC-Hackathon	*Lagos, Nigeria*
2023	**5th Place,** Treblle API Security Hackathon	*Croatia (Remote)*
